

# Factsheet 20ft MEGC, 380 bar

## TYPE 4 PRESSURE VESSEL SPECIFICATION

NPROXX manufactures high-strength, lightweight composite Type 4 pressure vessels for use in automotive and other industries. Our cutting edge technology, series manufacturing and experience spans 40 years and we are ideally placed to produce large quantities of customised, market ready product.

Dimension (L x W x H)	6,058 x 2,550 x 2,750mm
Certification Storage System	MEGC (ADR)
Usable Storage Capacity (working pressure min-max, 15°C)	490kg H <sub>2</sub>
Volume	20,000 Litre
Weight (empty)	Appr. 11,000kg
Corner Points	Bottom: 4 pcs Top: 4 pcs, ISO dimensions
Material Container	Galvanised steel
Housing Sides	Tarpaulin with customized digital printing, (PVC 760 g/m <sup>2</sup> , B1)
Top Cover	Open (not walkable)
Bottom Cover	Galvanized steel support plates for mounting pressure cylinders
Mounting Position PC	Vertical
Delivery Condition	6 bar nitrogen filling
Nominal Working Pressure	380 bar
Approved Temperature Range	-40 - +65 °C
Maximum Loadcycles (min-max-min)	unlimited
Lifetime	unlimited
Periodic Inspection Period	10 years
